Lunchtime Seminar: ‘Making the right decisions in a complex world’
by UK’s Centre for Workforce Intelligence (CfWI)

The Centre for Workforce Intelligence (CfWI) is a key contributor to the planning of future workforce requirements for health, public health and social care in England. They are commissioned by the Department of Health, Health Education England and Public Health England, to look at specific workforce groups and pathways, and to provide materials, tools and resources to inform workforce planning policy decisions at international, national and local levels. At the lunch time seminar they will share insights with WHO staff on:

- thinking about the future as part of workforce planning;
- modelling ‘wellbeing skills’ in the Horizon 2035 project for all of England, and the EU Joint Action work on future skills across Europe; and
- The opportunity to scaling up these approaches in low and middle-income settings.
