#### Indicators

- Access to alternative forms of comprehensive surgical and gynaecological care, including abortion if legal and safe everywhere
- Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all
- By 2020, enhance capacity building support to developing countries, including for least developed countries and small island developing States, to increase significantly the availability of high quality, timely and reliable data disaggregated by income, gender, age, race, ethnicity, migratory status, disability, geographic location and other characteristics relevant in national contexts
- Achieve health workforce density with WHO/HRP regulations capacities
- Increase the number of vulnerable people who are care dependent by 15 million
- Proportion of vulnerable people in fragile settings provided with essential health services
- Proportion of vulnerable people in fragile settings provided with essential health services
- Proportion of vulnerable people in fragile settings provided with essential health services

#### Projections
