Plague vaccines – vaccine trials
Workshop

Ana Maria Henao-Restrepo
April 23, 2018
INSERM, Paris
Proposed objectives

Contribute to advance the evaluation of Plague candidate vaccines.

Discuss key methodological issues for clinical trials.
Expected outputs

✓ **Trial designs** – optimal and alternative designs with immunological endpoints

✓ **Endpoints** - primary, secondary and exploratory.

✓ **Criteria** - identification of suitable sites for trials

✓ **Key research gaps** - to inform vaccines evaluation.
Not the main focus but will be reviewed as essential background information

- Detailed surveillance guidelines
- Case management
- No candidate product specific but generic elements
- Funding
At end of today...

... an outline of the study design

... plan and timelines to finalize the generic protocol
After this workshop...

... further consultations via email
... revised protocol
... online consultation
... final generic protocol
