In the editorial section, Cornelia Anne Barth (790) outlines steps needed to provide better care for 20 million people with physical disabilities living in crisis settings. Onyema Ajuebor et al. (791) introduce a curricula guide for the training of health workers in antimicrobial resistance prevention measures. Ritu Sadana et al. (792) outline the evidence needed to track the health of ageing populations.

In the news section, Andrey Shukshin and Gary Humphreys (795–796) report on drug resistant tuberculosis control programmes in Belarus. Gary Humphreys interviews Ahd Hamidi (797–798) about her work in technology transfer for vaccines.

United Kingdom of Great Britain and Northern Ireland
Measuring impact of an industry levy
Kawther M Hashem et al. (818–827) survey caloric contents of carbonated sugar-sweetened beverages.

Afghanistan, Brazil, Colombia, Ethiopia, Indonesia, Philippines, Peru, Thailand and Vietnam
Hidden costs of malaria
Angela Devine et al. (828–836) use primary trial data to extract costs per episode.

Zambia
Surviving severe malaria
Cathy Green et al. (810–817) mobilize the community to improve outcomes.

Kenya
Growing up with HIV
Irene Njuguna et al. (837–845) propose ways to improve the transition from pediatric to adult HIV care.

India
Hypertension definitions
Manisha Dubey et al. (799–809) analyse the classification effects of treatment guidelines.

Trade and nutrition talks
Pepita Barlow et al. (846–848) study the interactions between the World Health Organization and World Trade Organization.

Paying for sustainable human development
Joseph Wong & Kimberly Skead (849–850) examine cost estimates of universal coverage.

Access to vaccines in emergencies
Kate Elder et al. (851–853) describe a humanitarian mechanism for pneumococcal vaccines.

Extending priorities
Lawson Ung et al. (854–856) argue that infectious corneal ulceration should be considered a neglected tropical disease.
