HEALTH ASPECTS
OF
CHEMICAL AND BIOLOGICAL WEAPONS

Report of a WHO Group of Consultants

WORLD HEALTH ORGANIZATION
GENEVA
1970
This report was completed on 21 November 1969 and submitted on 28 November 1969 to the Secretary-General of the United Nations.

© World Health Organization 1970

Publications of the World Health Organization enjoy copyright protection in accordance with the provisions of Protocol 2 of the Universal Copyright Convention. Nevertheless governmental agencies or learned and professional societies may reproduce data or excerpts or illustrations from them without requesting an authorization from the World Health Organization.

For rights of reproduction or translation of WHO publications in toto, application should be made to the Division of Editorial and Reference Services, World Health Organization, Geneva, Switzerland. The World Health Organization welcomes such applications.

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the World Health Organization.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Director-General of the World Health Organization concerning the legal status of any country of territory or of its authorities, or concerning the delimitation of its frontiers.

The mention of specific companies or of certain manufacturer's products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature which are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

CONTENTS

1. INTRODUCTION ................................................. 9
2. COMPARISON OF THE WHO AND UNITED NATIONS REPORTS AND THEIR CONCLUSIONS ..................... 10
3. AIM AND SCOPE OF THE WHO REPORT ................. 11
4. WORKING DEFINITIONS OF CHEMICAL AND BIOLOGICAL WEAPONS FOR THE PURPOSES OF THIS REPORT ............... 12
5. SELECTION OF CHEMICAL AND BIOLOGICAL AGENTS AS MODELS FOR QUALITATIVE AND QUANTITATIVE ASSESSMENTS .......... 12
6. BASES OF THE ESTIMATES OF CASUALTIES ................. 13
7. LONG-TERM EFFECTS ........................................... 14
8. SUMMARY .................................................. 17
9. IMPLICATIONS FOR THE WORLD HEALTH ORGANIZATION AND ITS MEMBER STATES .......................... 19

ANNEX 1. CHEMICAL AGENTS

Classification and definitions ..................................... 23
A. LETHAL AGENTS .............................................. 25
   Historical Introduction ..................................... 25
   3. Viscants .................................................. 31
   (i) Mustard gas ............................................. 32
   Specification of toxicity of chemical agents ............. 27
   4. Nerve gases .............................................. 35
      (i) Sarin .................................................. 36
   1. Lung irritants ............................................ 27
      (ii) Agent VX .............................................. 39
   (i) Phosgene ............................................... 27
   2. Blood gases .............................................. 29
      (i) Hydrogen cyanide .................................... 41
      (ii) Cyanogen chloride .................................. 41
      (ii) Botulin toxins ...................................... 41
   (ii) Cyanogen chloride .................................... 30
B. INCAPACITATING AGENTS ....................................... 44
   Introduction ................................................ 44
   2. Psychochemicals ......................................... 46
      1. Bacterial enterotoxins and related substances ....... 44
         (i) LSD ................................................ 47
         (ii) Agent BZ ......................................... 49
      (i) Staphylococcal enterotoxins ......................... 44
C. HARASSING AGENTS (SHORT-TERM INCAPACITANTS) ............ 51
   Introduction ................................................ 51
   (i) CN .................................................... 53
   (ii) CS ................................................... 53
   (iii) DM .................................................. 55
D. ANTI-PLANT AGENTS ........................................... 55

5
ANNEX 2. BIOLOGICAL AGENTS

INTRODUCTION .................................................. 60

A. VIRAL INFECTIONS ............................................. 61
   1. Arthropod-borne (arboviruses) ......................... 61
      (i) Yellow fever ....................................... 62
      (ii) Tick-borne encephalitis ......................... 63
      (iii) Japanese encephalitis ......................... 64
      (iv) Dengue ........................................ 65
      (v) Venezuelan equine encephalitis .................. 66
      (vi) Chikungunya ................................... 66
      (vii) O’nyong-nyong .................................. 67
      (viii) Rift Valley fever .............................. 67
   2. Other viral infections ................................. 68
      (i) Influenza ......................................... 68
      (ii) Smallpox ....................................... 69

B. RICKETTSIAL INFECTIONS .................................... 70
   1. Typhus, epidemic .................................... 70
   2. Rocky Mountain spotted fever ....................... 71

C. BACTERIAL INFECTIONS ....................................... 73
   1. Plague ............................................... 73
   2. Anthrax ............................................. 74
   3. Tularaemia .......................................... 75

D. FUNGAL INFECTIONS .......................................... 78
   1. Coccidioidomycosis .................................. 78

E. THE PREDICTABILITY OF EPIDEMICS ......................... 79
   1. Epidemiological considerations ..................... 79
   2. Mathematical considerations ....................... 80

ANNEX 3. BASES OF QUANTITATIVE ESTIMATES

A. HYPOTHESES CONCERNING DELIVERY, DISPERSION AND CONCENTRATION OF AGENTS ..................................... 84
   1. Delivery ........................................... 84
   2. Specification of dosage ............................. 84
   3. Specification of toxicity and infectivity .......... 85
   4. Local meteorological factors ...................... 87
   5. Influence of local meteorological factors on the effectiveness of an attack with chemical weapons .......................... 88
   6. Fall-out as a factor influencing the incidence of attack .... 89
   7. Influence of the volatility of the agent ............ 91
   8. Possibility of more efficient means of attack ...... 91
   9. Conclusions on the feasibility of an attack with chemical weapons on urban areas .......................... 92
   10. Implications for protection ......................... 93

B. HYPOTHESES CONCERNING BIOLOGICAL AGENTS .................. 93

C. ESTIMATES OF NUMBERS OF CASUALTIES ....................... 95

D. POPULATION MODELS ........................................... 97
ANNEX 4. MEDICAL AND PUBLIC HEALTH EFFECTS OF ATTACK WITH CHEMICAL OR BIOLOGICAL WEAPONS

INTRODUCTION .......................................................... 101
GENERAL PRINCIPLES .................................................. 102
1. Problems in preparing for defence against an attack .......... 102
2. Immediate problems in the event of an attack ............... 103
3. Problems after the attack ........................................ 103
EXAMPLES BASED ON HYPOTHETICAL SITUATIONS ............ 103
Assumptions on availability of health resources ............... 103
A. TULARAEMIA ...................................................... 105
B. PNEUMONIC PLAGUE ............................................. 107
C. NERVE GAS—VX ................................................... 110

ANNEX 5. SABOTAGE OF WATER SUPPLIES

INTRODUCTION .......................................................... 113
CONTAMINATION BY THE TYPHOID BACILLUS ................... 115
CONTAMINATION BY BOTULINAL TOXIN, TYPE A ................ 116
CONTAMINATION WITH LSD ......................................... 117
PREVENTIVE MEASURES ............................................. 119

ANNEX 6. PSYCHOSOCIAL CONSEQUENCES OF CHEMICAL AND BIOLOGICAL WEAPONS

INTRODUCTION .......................................................... 121
POSSIBLE PSYCHOSOCIAL CONSEQUENCES OF THE THREAT OF CHEMICAL AND BIOLOGICAL WARFARE .................. 122
POSSIBLE PSYCHOSOCIAL CONSEQUENCES OF THE USE OF CHEMICAL AND BIOLOGICAL WEAPONS .................. 126
CONCLUSION ............................................................ 127

ANNEX 7. RESOLUTION 2454 A (XXIII) OF THE GENERAL ASSEMBLY OF THE UNITED NATIONS

Question of General and Complete Disarmament ............... 129

ANNEX 8. RESOLUTION WHA 20.54 OF THE TWENTIETH WORLD HEALTH ASSEMBLY

Consideration of Resolution 2162 (XXI) of the General Assembly of the United Nations: Question of General and Complete Disarmament ........................................ 131

ANNEX 9. RESOLUTION WHA 22.58 OF THE TWENTY-SECOND WORLD HEALTH ASSEMBLY

Question of General and Complete Disarmament: Chemical and Bacteriological (Biological) Weapons and the Consequences of their Possible Use. ........ 132
CONSULTANTS

Professor O. V. Baroyan, Director, Gamaleja Institute of Epidemiology and Microbiology, Academy of Medical Sciences of the USSR, Moscow, USSR

Dr D. Blaskovic, Director, Institute of Virology, Czechoslovak Academy of Sciences, Bratislava, Czechoslovakia

Dr K. Evang, Director-General, The Health Services of Norway, Oslo, Norway

Professor R. B. Fisher, Department of Biochemistry, University of Edinburgh, Scotland

Professor L. Husman, Department of Civil Engineering, Technological University, Delft, Netherlands

Dr J. H. Humphrey, Head, Division of Immunology, National Institute for Medical Research, London, England

Professor J. K. Jerne, Director, Paul Ehrlich Institute, Frankfurt am Main, Federal Republic of Germany

Professor J. Lederberg, Department of Genetics, Stanford University School of Medicine, Stanford, Calif., USA

Professor A. M. Lwoff, Director, Institute of Scientific Research on Cancer, Villejuif, France

Professor O. Maaloe, Institute of Microbiology, University of Copenhagen, Denmark

Professor J. Malek, Institute of Microbiology, Czechoslovak Academy of Sciences, Prague, Czechoslovakia

Professor M. Meselson, The Biological Laboratories, Harvard University, Cambridge, Mass., USA

Dr F. Pasquill, Meteorological Office, Bracknell, Berks., England

Mr J. P. Perry Robinson, Stockholm International Peace Research Institute (SIPRI), Sweden

Professor M. P. Schützenberger, Faculty of Science, University of Paris, France

Professor V. W. Sokel, Department of Community Health, Albert Einstein College of Medicine; Chief, Division of Social Medicine, Montefiore Hospital and Medical Center, New York, USA

Dr Berhane Tseuim-Lessane, Co-Director, Imperial Central Laboratory and Research Institute, Addis Ababa, Ethiopia

Mr F. W. J. Van Haaren, Head, Laboratories of the Municipal Water Works, Amsterdam, Netherlands

Secretary to the Group:

Dr M. Kaplan, Special Assistant for Science, Office of the Director-General, WHO, Geneva, Switzerland
