Eligibility criteria for Prequalification of IVDs – deadline for comments: 31 Dec 2018

This consultation has been organized to gather input from key stakeholders in order to determine the types of in vitro diagnostics for which prequalification is most needed and for which it will have the greatest benefit. The consultation should allow to map the most needed quality assured IVDs and should embrace the following concepts:

- burden of disease;
- health interventions associated with particular IVDs;
- existing WHO guidelines;
- EDL listing (if available prior to the consultation);
- available/expected donor funding.

Based on received feedback a priority level for inclusion on the prequalification scope will be assigned for each type of IVD based on the above criteria. The priority level will be used to determine timelines for inclusion in the prequalification of IVDs scope.

Kindly complete the on line survey by 31 December 2018.
