

Tests, treatments & PPE priorities

Philippe Duneton, Executive Director Unitaïd

6 July 2021

Overview | Current ACT-A priorities for 2021

Deploy what we have

Inpatients

(Severe & Critical cases)

Drive uptake of the very effective care package we already have

Focus for today

Prepare for what's coming

Outpatients

(Mild, Moderate & PEP)

Ensure country readiness for the promising products currently in Ph.3 trials

Focus for today

Enrich research pipeline

R&D pipeline

(all use cases with OP emphasis)

Enrich research pipeline, facilitate novel and combination treatment

Deploy what we have I/II | Driving uptake of the inpatient care package we already have

Guidelines

Reviewing guidance & developing operational guidance to ensure easier uptake

Technical support

Ensure availability of technical coordination for countries in need (to enable development of treatment strategy)

Accelerate access

Accelerate access through C19RM fast-track requests, and ensure support during surges, leveraging the partnership
(deep-dive overleaf)

**Deploy what
we have II/II**

**The Oxygen
Taskforce is
pushing on
targeted actions
to deploy the
inpatient care
package that is
already available**

**Technical Cooperation partner
support in >40 countries**

**>US\$ 210m C19RM Oxygen
requests approved so far for
27 countries¹**

**MoUs signed with liquid O₂
manufacturers, with a first
deal agreed for Zambia**

**Prepare for
what's coming**

**9 outpatient
products in Ph.3
trials likely to read
out by end of year,
that we need to
prepare for by...**

Scaling testing in countries

Ensuring country readiness
*(e.g. Unitaid/FIND RFP, allocation
criteria, engagement and visibility
on country-specific plans, demand
creation)*

**Being ready for procurement
fund needs in Q4 or early '22**
