

CORRIGENDA

WHO Mass Gathering COVID-19 Risk Assessment Tool – Religious Events, version 2
(WHO/2019-nCoV/Religious_Leaders_RAtool/2020.2)

Tab 2. Decision tree, figure starting in cell B7, second box from the top, first from the left (white)

Delete: Has the national government banned or restricted gatherings above a certain size that would not allow this event from happening?
Insert: Has the national government banned or restricted gatherings above a certain size that would not allow this event to proceed?

Tab 2. Decision tree, figure starting in cell B7, second box from the bottom, fourth from the right (light red)

Delete: Overall risk for MG event is considered VERY HIGH
Insert: Overall risk for MG event is considered HIGH

Tab 2. Decision tree, figure starting in cell B7

A feedback line/arrow has been drawn starting from the bottom side of the first box from the bottom, first from the right ('Develop Risk Communication Strategy'), to the second box from the top centre ('Conduct Risk Evaluation').

These corrections have been incorporated into the electronic file.
