

CORRIGENDUM

**Laboratory biosafety guidance related to coronavirus disease (COVID-19):
interim guidance, 13 May 2020**

WHO/WPE/GIH/2020.3

Page 10, Step 4, second table:

Delete: If the residual risk is still acceptable, further action is necessary, such as additional risk control measures, based on the initial risk evaluated in STEP 2, redefining the scope of work such that it is acceptable with existing risk control measures in place, or identifying an alternative laboratory with appropriate risk control strategies already in place that is capable of conducting the work as planned.

Insert: If the residual risk is still unacceptable, further action is necessary, such as additional risk control measures, based on the initial risk evaluated in STEP 2, redefining the scope of work such that it is acceptable with existing risk control measures in place, or identifying an alternative laboratory with appropriate risk control strategies already in place that is capable of conducting the work as planned.
