

CORRIGENDA

**Neurology and COVID-19: Scientific brief, 29 September 2021
(WHO/2019-nCoV/Sci_Brief/Neurology/2021.1)**

Page 6, lines 33–40

Delete: **Contributors**

In response to the ongoing global pandemic and increasing reports of neurological manifestations in COVID-19, the World Health Organization (WHO) established the Neurology and COVID-19 Global Forum in June 2020. This collaborative network of international stakeholders currently includes more than 70 clinicians, researchers and technical experts from 25 countries. The forum focuses on COVID-19 neurological surveillance, acute clinical care, follow-up, long-term impact and the provision of essential services. The development of this scientific brief has benefited from this wide range of expertise and from collaborations with other neurology and COVID-19 groups (12, 13). External reviewers of this document included members of this Global Forum.

Delete: **WHO:** Neerja Chowdhary, Tarun Dua, , Kavitha Kolappa, Nicoline Schiess, Katrin Seeher (Brain health unit, Department of Mental Health and Substance Use), Janet Diaz (Lead, Clinical Management Response COVID-19, Health Care Readiness), Jill Farrington (Regional Medical Officer, Cardiovascular Diseases and Diabetes) Wouter de Groote (Rehabilitation Programme, SDR Unit, Non-communicable Disease Department) and Yuka Sumi (Department of maternal, newborn, child and adolescent health and ageing).

Declaration of interests

All external reviewers were asked to complete the WHO declaration of interest form and underwent review by internet and bibliographic database. None had conflicts of interest requiring a management plan.

Plans for updating

WHO continues to monitor the situation closely for any changes that may affect this scientific brief. Should any factors change, WHO will issue a further update. Otherwise, this scientific brief document will expire 1 year after the date of publication.
