COVID-19 | Supply Chain Inter-Agency Coordination Cell
Weekly Situational Update

24 – 30 August 2020

Highlights

- The Biomed consortium is currently handling a global order for 32,000 items of biomedical equipment, with AFRO driving 41% of the demand.
- In Diagnostics, supply for manual tests and sample collection kits is unconstrained allowing products to be ordered as requested.
- Over 35,000 m³ of health supplies were delivered via free to user services to 156 countries.

Consortia updates

Personal Protective Equipment (PPE)
- 444 million units are being shipped, of which 149 million have already been delivered to affected countries.

Diagnostics
- 17.7 million PCR tests have been shipped, including 1.5 million automated tests and 16.2 million manual tests.
- Automated tests remain a highly scarce item that is subject to consortia allocation principles.

Biomedical equipment
- Over USD 46 million worth of supplies have been allocated and USD 26.7 million is expected for delivery in September.
- Procurement of supplies worth USD 20 million is ongoing and is expected to be delivered in November.

Figures include volumes secured through the consortia, as well as quantities purchased and allocated directly by the supplying agencies.
