COVID-19 | Supply Chain Inter-Agency Coordination Cell
Weekly Situation Update
7– 13 September 2020

**Highlights**

• Under the COVID-19 Supply Chain System, 408 million units of essential items worth over USD 515 million have been shipped so far, of which around half has already reached 169 recipient countries. The remaining half is either in transit, being prepared for shipment or contracted.
• PPEs continue to constitute the bulk of these shipments, standing at almost 90% of the delivered units.
• The Diagnostics Consortium is working to assess the final volumes and eligible countries for Phase 2 of allocation and supply, which will be critical to move forward with coordinated and equitable procurement of those volumes.

**Consortia Updates**

### Personal Protective Equipment (PPE)

• To date, 376 million units of PPE have been shipped, of which over 172 million have been delivered to 159 countries.
• The total demand currently stands at 239 million units, of which 183 million have already been assigned.

### Diagnostics

• Nearly 1 million tests and 2 million sample collection kits are in transit.
• Over 18 million PCR tests were secured, including 1.4 million automated tests delivered and 14.3 million manual and tests delivered.

### Biomedical equipment

• Over 15,000 oxygen concentrators have been delivered.
• Another 7,500 are being prepared for shipment.

Figures include volumes secured through the consortia, as well as quantities purchased and allocated directly by the supplying agencies. For details on WHO stocks and deliveries consult the WHO COVID-19 Weekly Operations Update.

**COVID-19 related dispatches through WFP Hubs – common services**

- Dubai
- China
- Kuala Lumpur
- Liege

- Weekly total 2,122 m³ of cargo dispatched to 41 countries

WHO, MSF Belgium, UNICEF, IMC, ICRC, UNHCR, IFRC

Figures exclude transits and are based on currently available data and subject to change after weekly reconciliation.

**COVID-19 six-week allocated pipeline overview**

- 44,000 m³ incoming cargo, based on currently available data on expected pipeline

67 plane loads
