

# COVID-19 | Supply Chain Inter-Agency Coordination Cell

## Weekly Situation Update

14 – 20 Septembre 2020

### Highlights

- Requests for ocean transport have been steadily increasing; currently 5,100 m<sup>3</sup> are being processed on behalf of UNICEF.
- Demand for ventilators has increased and the Clinical Care consortium is working on fulfilling current funded demand, as well as the demand for concentrators and PSA oxygen plants.

### Consortia Updates

#### Personal Protective Equipment (PPE)

- To date, 362 million units of PPE have been shipped, of which over 210 million have been delivered to 169 countries.
- The total demand currently stands at 240 million units, of which 183 million have already been assigned.

#### Diagnostics

- Over 15.5 million tests were delivered to over 100 countries, of these, 14 million are manual tests.
- Over 4.3 million sample collection kits were delivered to 95 countries.
- Additional 300 thousand tests and 100 thousand sample collection kits are in transit.

#### Biomedical equipment

- Nearly 145 thousand units of Biomed equipment have been delivered to date.
- Around 15 thousand units are currently en route to destination.

*Figures include volumes secured through the consortia, as well as quantities purchased and allocated directly by the supplying agencies.  
For details on WHO stocks and deliveries consult the [WHO COVID-19 Weekly Operations Update](#).*
