PAHO launches app that helps health workers use PPE more effectively

The Pan American Health Organization (PAHO) launched a mobile application, MedPPE, this week that provides detailed information on the personal protective equipment that health personnel should use to guard against COVID-19, depending on their role and workplace.

MedPPE emphasizes the role and timing of health workers' jobs and offers specific information to prevent the spread of COVID-19 and is available in Spanish, English, Portuguese, and French. The guidelines are aimed at all personnel working in health facilities, including security guards, administrative and cleaning personnel, transfer assistants, nurses, biomedical and imaging technicians, surgeons, and physicians, among others.

The correct use of PPE remains key to preventing infection and spread of the virus in hospital settings and to protecting essential workers in the response to the pandemic.

MedPPE provides guidance for the use of PPE according to workers' function, the level of care they provide, and the multiple environments of primary health care and hospitals.

For more information on MedPPE, click [here](#).

**Key Figures**

- WHO-led UN Crisis-Management Team coordinating 23 UN entities across nine areas of work
- 145 GOARN deployments conducted to support COVID-19 pandemic response
- 19 948 965 respirators shipped globally
- 197 343 426 medical masks shipped globally
- 8 540 231 face shields shipped globally
- 6 713 379 gowns shipped globally
- 35 821 900 gloves shipped globally

More than 2.5 million people registered on OpenWHO and able to access 25 topical courses in 44 languages

*For the latest data and information, see the [WHO COVID-19 Dashboard](#) and [Situation Reports](#)*
On 27-28 January 2021, WHO Regional Office for Europe and the Ukraine WHO Country Office supported the Ministry of Health and the Ukrainian Public Health Centre to conduct a Country Intra-Action Review (IAR) for the COVID-19 response in Ukraine. The IAR allowed to review the national functional capacity of the public health and emergency response systems and to identify practical areas for immediate remediation or continuous improvement of the current response to the COVID-19 outbreak.

During the review, over 130 participants from multisectoral teams took part in 7 groups centered around the pillars of the response, including country-level coordination, risk communication and community engagement, points of entry, national laboratories, infection prevention and control, and operation support and logistics. The format of the IAR was a mix of in person and virtual collaboration to adjust to COVID-19 prevention measures in place.

The main goal of the IAR was to support the country in reviewing the actions implemented in all the critical response areas over the past year at the national and regional levels. WHO Regional Office for Europe provided guidance on the organization of an IAR according to WHO recommendations, and helped to run and facilitate the review sessions.

The IAR will provide practical recommendations and action points identified by the participants for sustained improvement of the ongoing COVID-19 response and updating the Ukrainian Country Preparedness and Response Plan (CPRP) accordingly.
Public health response and coordination highlights

During the United Nations (UN) Crisis Management Team (CMT) meeting on 27 January 2021, WHO provided an update on the SARS-COV-2 variants identified in the UK, South Africa and Brazil and noted that current vaccines appear to be effective to the variants. WHO advised the continued development of a common risk monitoring framework, building on existing detection systems, linking human/animal transmission with broader surveillance efforts.

The Yellow House, an independent consultant briefed on their COVID-19 Supply Chain System (CSCS) assessment, citing immense achievements made by UN partners, including WFP, UNICEF and WHO among others, in the procurement and delivery of large quantities of critical COVID-19 supplies to countries worldwide.

On external communications, WHO informed that it is working with UNICEF on vaccine equity campaigns and asked the rest of the UN system to draw attention to the success in procuring and delivering large quantities of essential goods during a critical phase of the pandemic.
COVID-19 Preparedness

Mauritius conducts a COVID-19 vaccine simulation exercise prior to the national vaccine roll-out.

In collaboration with the Ministry of Health, the WHO Country Office in Mauritius conducted a discussion-based table top exercise on 25 January 2021. The exercise focused on the national deployment and vaccination plan (NDVP) and tested the planning assumptions before national vaccination roll-out. The exercise was carried out using the COVID-19 vaccine tabletop exercise packages that were developed and published by WHO.

The exercise focused on potential regulatory and safety issues, as well as the overall strategy, supply chain and communications aspects of vaccine roll-out. It helped test the regulatory frameworks and systems, as well as procedures and oversight for monitoring vaccine safety after it is deployed, while the strategy, supply chain and communications aspects helped identify the target populations and test vaccination strategies, manage supply chains, and prepare communication plans to promote vaccine acceptance and uptake.

Around 25 participants joined in the exercise including from National Regulatory Agency, decision-makers, logisticians, warehouse & logistic managers and communication specialists. The exercise helped to test and make final adjustments to the national vaccination strategy and plan before the national roll-out started on 26 January 2021.

Prior to the exercise, together with AFRO a brief training was provided to the MoH and Country Office staff to update them on the vaccine exercise package content and ensure smooth implementation and support. The vaccine exercise packages have been developed by the Health Security Preparedness (HSP) Department and through the collaboration with the Access to COVID-19 Tools (ACT) Accelerator’s Country Readiness and Delivery (CRD) workstream.
COVID-19 Partners platform

Trainings for roll-out of vaccine introduction

WHO, UNICEF and partners are supporting countries in preparing for COVID-19 vaccine introduction through the Access to COVID-19 Tools (ACT) Accelerator.

The Country Readiness and Delivery (CRD) workstream – which is part of the ACT Accelerator and is included in the SPRP – has developed a toolbox with guidance, tools, and trainings.

The trainings for national/subnational focal points and health workers to prepare for COVID-19 vaccine roll-out have been taken by more than 35,000 learners globally and are being translated into 12 languages. Additional trainings and resources, including for acceptance and uptake of COVID-19 vaccines and preparing for COVID-19 vaccine supply and logistics, will be added to the toolbox shortly.

With the launch of the CRD COVID-19 vaccine introduction on the Partners Platform online tool, WHO is providing technical training sessions to ensure all the new Vaccine Regional Administrators (VRA) and Vaccine Country Administrators (VCA) are able to quickly and efficiently perform essential tasks in the National Deployment and Vaccination Plan (NDVP) process. VRAs and VCAs are appointed by the Regional Advisors for Immunization.

In these digital training sessions, provided in English, Spanish, French and Arabic, WHO technical experts from the Partners Platform team will guide participants through the completion and uploading of the NDVP and provide an overview of the next stages of the process, including validation by a government official, Costing Technical Assistance and funding resource needs, assessment by the Regional Review Committee (RRC), and progression to allocation by the Joint Allocation Task Force.

These trainings take place from Monday, 25 January to Tuesday, 5 February. Regional Advisors for Immunization can provide the VCAs and RCAs with the training schedule. Archived recordings of these sessions will be available here.
Operations Support and Logistics

The COVID-19 pandemic has prompted an unprecedented global demand for Personal Protective Equipment (PPE), diagnostics and clinical care products.

To ensure market access for low- and middle-income countries, WHO and partners have created a COVID-19 Supply Chain System, which has delivered supplies globally.

The table below reflects WHO/PAHO-procured items that have been shipped as of 29 January 2021.

Appeals

WHO appreciates and thanks donors for the support already provided or pledged and encourages donors to give fully flexible funding for the SPRP and avoid even high-level/soft geographic earmarking at e.g. regional or country level. This will allow WHO to direct resources to where they are most needed, which in some cases may be towards global procurement of supplies, intended for countries.

As of 20 January 2021

Global Strategic Preparedness & Response Plan (SPRP)

US$ 1.5 billion raised
US$ 1.7 billion requested

US$ 1.5 billion raised by WHO during 2020
US$ 1.3 billion projected utilization for 2020 SPRP
US$ 240 million raised by the COVID-19 Solidarity Response Fund
US$1 billion on country support and regional coordination

The status of funding raised for WHO against the SPRP can be found here

*Utilization* by type of funds by level of organization (US$ million)

*Utilization* by type of funding by level of earmarking (US$ million)

*Based on interim 2020 year-end figures and estimated 2021 Q1 transition period implementation
WHO Funding Mechanisms

COVID-19 Solidarity Response Fund

The COVID-19 Solidarity Response Fund remains the foremost way for companies, organisations and individuals to contribute to the essential work of WHO and its partners to help countries prevent, detect and respond to the global pandemic.

By 29 January 2021, more than 659,000 leading companies, foundations and individuals from more than 190 countries had committed more than US$ 241 million in fully flexible funding to the COVID-19 Solidarity Response Fund to support the lifesaving work of WHO and its partners.

Health Learning

WHO is expanding access to online learning for COVID-19 through its open learning platform for health emergencies, OpenWHO.org.

The OpenWHO platform was launched in June 2017 and published its first COVID-19 course on 26 January 2020.

4 830 789 Course enrollments

COVID-19 Global Preparedness and Response Summary Indicators

Countries have a COVID-19 preparedness and response plan
- Yes: 91% (N=195)
- No: 7% (N=195)
- No information: 47% (N=195)

Countries have a clinical referral system in place to care for COVID-19 cases
- Yes: 89% (N=195)
- No: 11% (N=195)
- No information: 37% (N=195)

Countries have a COVID-19 Risk Communication and Community Engagement Plan (RCCE)
- Yes: 97% (N=195)
- No: 19% (N=195)
- No information: 100% (N=195)

Countries that have defined essential health services to be maintained during the pandemic
- Yes: 63% (N=195)
- No: 34% (N=195)
- No information: 22% (N=195)

Countries in which all designated Points of Entry (PoE) have emergency contingency plans
- Yes: 67% (N=195)
- No: 39% (N=195)
- No information: 20% (N=195)

Countries have a COVID-19 laboratory testing capacity
- Yes: 100% (N=195)
- No: 6% (N=195)
- No information: 85% (N=195)

Countries with a national IPC programme & WASH standards within all health care facilities
- Yes: 39% (N=195)
- No: 14% (N=195)
- No information: 47% (N=195)

Countries have a health occupational safety plan for health care workers
- Yes: 28% (N=195)
- No: 6% (N=195)
- No information: 67% (N=195)

COVID-19 Global Preparedness and Response Summary Indicators

Selected indicators within the Monitoring and Evaluation Framework apply to designated priority countries. Priority Countries are mostly defined as countries affected by the COVID-19 pandemic as included in the Global Humanitarian and Response Plan. A full list of priority countries can be found here.

**Priority countries with multisectoral mental health & psychosocial support working group**

- Yes: 83%
- No: 6%
- No information: 11%

**Priority countries with an active & implemented RCCE coordination mechanism**

- Yes: 89%
- No: 11%

**Priority countries that have postponed at least 1 vaccination campaign due to COVID-19**

- Yes: 45%
- No: 55%

**Priority countries where at least one Incident Management Support Team (IMST) member trained in essential supply forecasting**

- Yes: 52%
- No: 48%

**Priority countries with a contact tracing focal point**

- Yes: 72%
- No: 23%

**Priority countries with an IPC focal point for training**

- Yes: 83%
- No: 16%

The Unity Studies: WHO Early Investigations Protocols

Unity studies is a global sero-epidemiological standardization initiative, which aims at increasing the evidence-based knowledge for action. It enables any countries, in any resource setting, to gather rapidly robust data on key epidemiological parameters to understand, respond and control the COVID-19 pandemic.

The Unity standard framework is an invaluable tool for research equity. It promotes the use of standardized study designs and laboratory assays.

Global COVID-19 Clinical Data Platform

Global understanding of the severity, clinical features and prognostic factors of COVID-19 in different settings and populations remains incomplete.

WHO invites Member States, health facilities and other entities to participate in a global effort to collect anonymized clinical data related to hospitalized suspected or confirmed cases of COVID-19 and contribute data to the Global COVID-19 Clinical Data Platform.

Leveraging the Global Influenza Surveillance and Response System

WHO recommends that countries use existing syndromic respiratory disease surveillance systems such as those for influenza like illness (ILI) or severe acute respiratory infection (SARI) for COVID-19 surveillance. Leveraging existing systems is an efficient and cost-effective approach to enhancing COVID-19 surveillance. The Global Influenza Surveillance and Response System (GISRS) is playing an important role in monitoring the spread and trends of COVID-19.
