Simultaneous implementation of interventions to prevent anaemia. Are there any risks?

Webinar: 26 November 2019 at 9:00 EST

**Speaker Biographies**

**Stanley Zlotkin, OC, MD, PhD, FRCP(C)**

Stanley Zlotkin received his medical training at McMaster University in Hamilton, Ontario, paediatric training at McGill University in Montreal, and he obtained a PhD in nutritional sciences at the University of Toronto. He has worked as a clinician-nutritionist and research scientist at The Hospital for Sick Children since 1980. He is Professor in the Department of Paediatrics, the Dalla Lana School of Public Health and the Department of Nutritional Sciences at the University of Toronto, and past Head of the Division of Gastroenteriology, Hepatology & Nutrition and Medical Director of Nutrition Support for SickKids.

Dr. Zlotkin has focused on research and advocacy to control micronutrient malnutrition in children. His research team developed the concept of micronutrient powders for “home-fortification” of complementary foods. Stan is a frequent consultant to governments and UN agencies on issues related to global child health nutrition.

Dr. Zlotkin has received multiple awards for his research and advocacy work including the Order of Canada, the highest civilian honour in Canada. Today, Dr. Zlotkin continues to head the Sprinkles Global Health Initiative at The Hospital for Sick Children in Toronto (Sickkids) and is an active researcher with well over 100 peer-reviewed publications. In 2010, Stanley Zlotkin was appointed as Vice-President Medical and Academic Affairs at SickKids and in September 2012 he was named as the inaugural Chief of the SickKids Centre for Global Child Health.

**Reina Engle-Stone, Ph.D**

Reina Engle-Stone is Assistant Professor at the Department of Nutrition and Institute of Global Nutrition at the University of California, Davis. Her research is focused on micronutrient nutrition among women and young children in low-income settings. Research themes include planning, monitoring, and evaluation of food fortification programs; cost-effectiveness and coherence among micronutrient intervention programs, and nutritional assessment.

Dr. Engle-Stone holds a PhD in Nutrition from the University of California, Davis.
