PRIMARY HEALTH CARE IS...

Multisectoral policy & action

Empowered people & communities

HEALTH & WELL-BEING

Primary care & essential public health functions as the core of integrated health services

Primary health care is the best way to improve people's health and make health and well-being for all a reality.
It allows communities to thrive in healthy environments, with quality health care. It empowers individuals to take care of their own health and the health of their families.

WHAT ARE YOU DOING TO MAKE PRIMARY HEALTH CARE A REALITY?

World Health Organization
