

Coronavirus Disease 2019 (COVID-19) Situation Report #3 20 July 2020

#3

Report as of 20 July 2020, 11:30 am ICT

Situation Summary

Highlights of Current Situation Report

- As of 20 July 2020, 171 confirmed cases of COVID-19 have been reported from Cambodia to WHO, of which 136 have recovered. 133 cases were acquired overseas, representing 10 nationalities in addition to Cambodian, with the rest locally acquired. Eight patients are currently being treated in Khmer Soviet Friendship Hospital and 25 at Chakangre Health Centre, both in Phnom Penh.
- 247 contacts are being quarantined at a quarantine centre in Phnom Penh and are monitored daily for possible development of symptoms.
- Points of Entry (POE) measures are currently being strictly implemented, including testing on arrival and upon completion of 14-day quarantine for all airport passengers and at border crossings.
- On 15 July, the Ministry of the Interior hosted a high-level meeting between the Royal Government of Cambodia (RGC), key institutions and the UN Country Team (UNCT) on the joint programme to support returning migrants during COVID-19.
- Cambodia is preparing to participate in the upcoming APSEG TAG, which will focus on COVID-19 response efforts.
- The National COVID Masterplan includes the creation of multi-sectorial provincial committees led by the provincial governors. Plans are being developed to build capacity at provincial and district level around key priority areas, with support from WHO.
- Oxygen concentrators (300) are soon to be shipped to Cambodia to strengthen health care readiness.

Upcoming Events and Priorities

- Rapid Response Teams (RRTs) at provincial level will receive refresher trainings to build their surveillance and contact tracing capacities. A Training of Trainers is being led by MOH Department of Communicable Disease Control (CDC) with support from technical partners including WHO.
- WHO is supporting MOH to expand and decentralise Laboratory testing capacity for COVID using GeneXpert technology at three provincial laboratories; Siem Reap, Sihanoukville and Battambang. A funding proposal has been developed for Global Fund, implementation plans have been developed and renovations are ongoing at the laboratory in Siem Reap.
- A third version of the clinical guidelines is being finalized. It includes content on management of severe and
 critical cases; oxygen considerations; procedures for SARS-CoV-2 monitoring; discharge criteria; use of
 medicines; and post-discharge management. A reproductive maternal and child health services COVID-19
 technical brief is also being finalized and is intended to complement the clinical guidelines.
- The government continuously assesses the adjustment of non-pharmaceutical interventions (NPIs) through a
 gradual step-wise approach that considers the effectiveness, socio-economic cost, and public acceptability of
 each measure, while continuing to increase surveillance to inform decision-making.

National Transmission Assessment

1-Imported. As of 20 July 2020, 133 (78%) of the 171 cases were imported, and the remaining cases were locally acquired and have all been epidemiologically linked to confirmed cases. All cases since 11 April (n=49) have been imported. There is no indication of localized transmission. All confirmed cases are isolated in hospitals; currently 33 are in hospital. There are no reports of undiagnosed respiratory clusters through the national hotline. ILI and SRI reports are below expected levels for July as is the case in most

parts of the world. A total of 43,181 individuals have been tested using PCR, with a positivity rate of 0.39%. In total 51,987 tests have been performed as of 20 July 2020, including 2,128 ILI/SARI sentinel surveillance specimens which have been tested negative for SARS-CoV-2.

Strategic Approach

National and Provincial Public Health Response

Incident Management Systems

- Inter-Ministerial Committee, chaired by the Minister of Health, with Secretaries of State
- National COVID-19 Committee, chaired by Samdech Prime Minister
- Provincial COVID-19 Committees, chaired by Provincial Governors
- Committee on Economic and Financial Policy (CEFP)/ MEF of 4 Working Groups to address the socioeconomic impacts of COVID-19

System and Policy Development

- State of Emergency legislation was promulgated into law on 29 April 2020; has not been enacted
- Go.Data Platform used as a surveillance database including laboratory and contact tracing information
- NIPH and CDC databases have been adjusted to allow for multi-source dataset on testing and surveillance

Key Priorities

- Weekly clinician webinars and Telegram group led by Department of Hospital Services (DHS) to accelerate the
 dissemination of clinical and IPC guidance materials and to respond to emerging questions and concerns from
 clinicians on case management
- A primary health care strategy for COVID-19 is currently being developed and includes roles and responsibilities for health centres in the potential scenario of community transmission
- National programmes are developing specific COVID-19 preparedness and responses plans

Strategic Approach to COVID-19 Prevention, Detection and Control

Testing strategy and contact tracing system in place

A broad testing strategy is being implemented nationwide, including testing all suspect cases meeting case definition, active surveillance for pneumonia cases in hospitals, testing at POEs at day 1 and day 13 of 14-day quarantine and testing all influenza-like illness (ILI) and severe acute respiratory illness (SARI) samples for COVID-19. Hot-spot surveillance strategies and targeted testing of high-risk populations are also being implemented as necessary.

• Risk communication and community engagement

A community-based surveillance strategy has been developed and will be piloted for case detection at the health center level and in the community. The Ministry of Interior is reinforcing the monitoring of quarantine through follow-up and fines for individuals who do not follow guidelines.

A community engagement strategy has been drafted in line with WPRO guidance. MOH has developed a Risk Communication and Community Engagement monitoring and supervision plan being implemented from May 2020 to July 2020 for health care personnel and village personnel in 12 provinces.

NPIs (recorded in table at end of report)

Best Practices / Lessons Learned

Factors Contributing to Strong Response

Strong leadership and coordination

- Whole-of-government, whole-of-society response led by the Prime Minister, with public health actions led by Minister of Health
- National Master Plan for COVID-19 developed with budget of \$62 million for first year

· Past investments have built a functional public health system

- Multi-source surveillance for COVID-19, including event-based surveillance (with 115 hotline) and expanded ILI/SARI surveillance
- Almost 3,000 RRT members across the country conduct case investigation and contact tracing

Risk communication and community engagement

- Timely messages disseminated through TV, radio and social media, regular press releases, press conferences and media briefings
- Targeted communication materials developed for at-risk groups, including migrants and garment factory workers
- Community engagement strategy being rolled out to encompass all aspects of surveillance and response for COVID-19, particularly in the event of community transmission

International solidarity and cooperation

- Open and transparent health system response in the country
- o Close technical and operational cooperation between UN agencies and other development partners
- High-level participation in international meetings, including regular coordination between National IHR Focal Points

Non-Pharmaceutical Interventions (NPI)

Narrative Non-Pharmaceutical Interventions

Large-scale NPIs announced on 16 March 2020 included the closure of all education facilities nationwide, with distance learning measures instituted. WHO guidelines on schools and workplaces reopening with eight main recommendations have been incorporated into the national guidelines.

On 15 July, the Ministry of the Interior hosted a high-level meeting between the Royal Government of Cambodia and the UN Country Team on the Joint Programme to Support Returning Migrants during COVID-19 Crisis and its Impacts. Work is ongoing between government and UN partners to develop a detailed COVID-19 Multi-Partner Trust Fund work plan.

Karaoke bars (KTVs) and nightclubs were closed on 17 March. On 7 July, the Phnom Penh Municipal Administration announced KTVs and clubs could reopen, provided they convert their venues into restaurants and receive a city hall permit to operate. Venues must also follow MOH and Ministry of Tourism-mandated measures such as physical distancing, open-air ventilation and other precautions.

To limit importation of COVID-19 cases, international arrivals from several high-burden countries were banned beginning in March. Lifting of these bans on 20 May has been accompanied by strict entry requirements for all non-diplomatic foreigners entering Cambodia including: requiring negative COVID-19 health certificates, medical insurance, testing upon arrival, 14-day quarantine and further testing on day 13.
