

Highlights (6 June – 10 July 2022)

- Between 6 June and 10 July, 100 new RT-PCR confirmed COVID-19 cases were reported in Cambodia. All of these cases were locally acquired.
- As of 11 July 2022, a total of 136,374 confirmed cases of COVID-19 and 3,056 deaths have been reported from Cambodia since 27 January 2020, of which 133,244 have recovered.
- As of 11 July 2022, a total of 2,635,983 tests have been performed using reverse-transcriptase polymerase chain reaction (RT-PCR) in Cambodia. 12,146 RT-PCR tests were performed between 6 June and 10 July.
- As of 15 July 2022, 42.6 million doses of COVID-19 vaccine were administered to the eligible group of 3 years old and above. 90.1% of total population completed the primary series (two doses) and 59.9 % received at least one dose of booster dose.
- Epidemiological situation has remained stable over last few months. However, there are early signals of increased transmission with increasing number of cases and clusters being reported. BA.5 may be the dominant strain circulating in Cambodia, though this information is based on a limited number of samples available for genomic sequencing. No COVID-19 death has been reported since 20 April 2022
- COVID-19 sustained management is important; in particular refocusing efforts on multisource surveillance including testing strategies for detection and monitoring spread, promoting infection prevention control in healthcare facilities, having a subnational PHSM strategy of 'what' additional PHSM may be required and 'when' and continuing vaccination efforts with a focus on those at high-risk of severe disease and high-risk of infection.

Epidemiology

Figure 1. Epidemic curve of confirmed COVID-19 cases by date of report, 2021-2022*

*As of 30 Sep 2021, only RT-PCR test results are being reported in the case numbers. Mandatory testing for incoming travellers has been lifted since 17 March 2022.

Table 1. COVID-19 vaccination roll-out by target groups (healthcare workers, elderly, adults, and children)
*data as of 15 July 2022

Started	Total pop (N=16,000,000)	Adults		Adolescents	Children		
		≥60 (N=1,378,688)	≥18 years (N=10,000,000)	12 to 17 years (N=1,827,348)	6 to 11 years (N=1,897,382)	5 years (N=304,317)	3-4 years (N=610,730)
		10 Feb 21	10 Feb 2021	1 Aug 2021	17 Sep 2021	1 Nov 2021	22 Feb 2022
1 st dose	15,104,932 (94.4 %)	1,411,594 (102.4 %)	10,337,167 (103.4 %)	1,841,919 (100.8 %)	2,078,370 (109.5 %)	412,664 (135.6 %)	434,812 (70.0 %)
2 nd dose	14,411,480 (90.1 %)	1,395,756 (101.2 %)	9,990,132 (99.9 %)	1,783,567 (97.6 %)	2,035,054 (107.3 %)	347,994 (114.4 %)	254,733 (40.3 %)
3 rd dose	9,582,177 (59.9 %)	975,502 (70.8 %)	6,634,491 (66.3 %)	1,512,825 (82.8 %)	1,365,954 (72.0 %)	64,421 (21.2 %)	4,486 (0.7 %)
4 th dose	3,150,255 (19.7 %)	256,989 (18.6 %)	2,601,817 (26.0 %)	485,942 (26.6 %)	59,552 (3.1 %)	2,944 (1.0 %)	N/A
5 th dose	388,340 (2.4 %)	380,183 (3.8 %)		8,157 (0.4 %)		N/A	N/A

N/A: Not applicable

Table 2. Adverse event following immunization (AEFI) reporting rate per 100,000 doses by vaccine product
*data as of 15 July 2022

COVID-19 Vaccine	Sinovac (CoronaVac)	Sinopharm (BBIBP-CorV)	AstraZeneca (Covishield)	Janssen (Ad26.COV2-S)	AstraZeneca (Vaxzevria)	Moderna (Spikevax)	Pfizer- BioNTech (Comirnaty)	Total
Number of cases	101	79	29	4	23	3	1	240
Total dose administered	25,425,892	7,507,947	354,111	1,053,151	4,158,876	352,638	2,731,418	41,584,033
AEFI reporting rate per 100,000 doses	0.40	1.05	8.19	0.38	0.55	0.85	0.04	0.58

Public health and social measures

- Mask wearing remains mandatory for indoor settings and closed spaces such as meeting room and cinema.
- As of 6th July, MOH stated inbound unvaccinated or not fully vaccinated travellers are exempted from quarantine requirements, but are required to take a rapid antigen COVID-19 test on arrival
