

Coronavirus disease (COVID-19)

Situation Report 38 Philippines 4 June 2020

Data reported by the Department of Health on 4 June 2020

Highlights

- Out of the total 20,382 confirmed cases reported in the Philippines until today, 55% are male, with the most affected age group 30-39 years (22.2%) followed by 20-29 years (19.1%)**
- 57.9% of cases reported from National Capital Region (NCR), followed by Central Visayas (14.3%), CALABARZON (8.9%), and Central Luzon (3.3%)**
- Out of the 984 confirmed deaths, 64% are male, with the most affected age group over 70 years (36.6%) followed by 60-69 years (30.5%)**
- 74.9% of deaths reported from NCR, followed by CALABARZON (11.0%), Central Luzon (3.3%), and Central Visayas (2.9%)**
- Department of Health (DOH) emphasizing that the increase in cases is due to clearing of delayed reports combined with real-time reporting of cases through recently implemented COVID KAYA mobile application**
- According to DOH among all active, confirmed cases, 93.7% are mild**
- DOH strongly emphasizing the importance of adherence to minimum precautionary measures, with NCR currently in General Community Quarantine**
- Currently 40 laboratories using RT-PCR accredited for COVID-19 testing, with latest additions: Philippine Red Cross-Port Area in NCR, and Teresita Jalandoni Provincial Hospital Region in Region VI, as well as 12 laboratories using GeneXpert with latest addition: Mariano Marcos Memorial Hospital in Region I**
- 100% of health facilities are regularly reporting to DOH's DataCollectApp showing less than 36.1% occupancy rate of ward beds, ICU beds and isolation beds for COVID-19 patients**

PHILIPPINES SITUATION IN NUMBERS

Beat COVID-19 Today

A COVID-19 Philippine Situationer

Issue 37 | June 3, 2020

Highlights and Recent Updates on COVID-19

- DOH recorded **13,969 active cases** as of June 2, with majority of the patients exhibiting **mild symptoms** (13,095; 93.7%).
- A total of **2,675** (14% of all reported cases) are **healthcare workers**, with **1,457 recoveries** and **32 deaths**.
- Forty (40) licensed laboratories** across the country are now equipped to perform the **RT-PCR test** for COVID-19 while **12 laboratories** are licensed to perform COVID-19 testing using **GeneXpert cartridges**.
- Overall **capacity to manage and admit COVID-19 patients** is still **sufficient** with available beds and mechanical ventilators in ICU, isolation, and COVID wards based on information gathered from **DOHDataCollectApp**.
- As of June 2, a total of **50,175 Returning Overseas Filipinos (ROF)** have arrived (Land-based: 13,149; Sea-based: 37,026). Of this figure, 43,123 were released from facility quarantine (Land-based: 11,094; Sea-based: 32,029). Among the ROF, 480 are currently admitted (Land-based: 72; Sea-based: 158; 125 recovered; and 1 death).
- DOH reiterates the need for the public to **embrace the New Normal setting**. Everyone is encouraged to remove shoes, immediately change clothes, or take a bath when returning home.

Case Summary

Probable Cases As of June 2, 2020

Suspect Cases

SEVERE: Pneumonia, Difficulty of Breathing
CRITICAL: Intubated
PROBABLE: Previously termed as PUIs (mild or critical) with inconclusive or unofficial test results
SUSPECT CASES: Previously termed as PUIs (mild or critical) with no test done or awaiting test results

Country readiness and response operations

Country-level coordination

The Inter-Agency Task Force for the Management of Emerging Infectious Diseases (IATF) issued [Resolution #43](#) on 3 June re-imposing movement restrictions to essential activities only for persons below 21 years old, above 60 years, those with health risks, and pregnant women, including for accessing essential goods and services, and for work in offices, under the modified general community quarantine put in place in the majority of the country.

The latest DOH situationers are available here:

- bit.ly/COVIDPHSituationer037 3 June 2020
- bit.ly/COVIDPHSituationer038 4 June 2020

Risk communication

DOH, in partnership with WHO and UNICEF, is conducting the 2nd round of the COVID-19 Rapid Public Perception Survey to improve communication strategies for COVID-19 response. bit.ly/COVIDPublicPerceptions2

Internews released [Social Media Rumour Bulletin #4](#), showing the spreading of rumours used as jokes (i.e. drinking of “uncontaminated semen” as a cure or for cleaning and sanitising of hands to protect from COVID-19) as high risk in spite of their apparent unlikelihood, because of high level of engagement as well as encouragement of risky behaviour that could lead to the spread of sexually transmitted diseases.

UNICEF distributed 19,500 fans with COVID-19 messages through 2 health facilities in Maguindanao, and food packs distributed through government agencies to 2 provinces in Bangsamoro Autonomous Region in Muslim Mindanao (BARMM)

Public Perception Survey on COVID-19 (Round 2)

bit.ly/COVIDPublicPerceptions2
This survey will close on June 6, 2020

The Department of Health, in partnership with WHO and UNICEF, is conducting a survey to further understand public perception of COVID-19.

Your responses to this survey will help the DOH and its partners improve the communication strategies for the COVID-19 response.

Surveillance

Thanks to real-time reporting of newly confirmed COVID-19 cases through the COVID KAYA mobile application, Provincial, City and Municipal Epidemiological Surveillance Units (ESUs) are now able to provide timely analysis for informed decision-making on urgent measures to be taken at barangay level, especially in high-risk settings such as prisons, health facilities, and among returning Overseas Filipino Workers (OFW).

For example, South Cotabato province tightened monitoring of returning OFWs and locally stranded individuals (LSIs) after 2 cases tested positive. The Philippine National Police (PNP) reportedly now has a total of 346 confirmed cases among its staff, including 4 deaths. Special surveillance amongst front-liners in Dagupan city, Pangasinan province in Region I, detected 14 out of 517 positive cases. Thanks to enhanced surveillance in areas with more relaxed quarantine measures in place, Cebu City recorded 45 new cases, while Caraga (Region XIII) confirmed 3 additional cases.

Necessary adjustments are ongoing to speed up the sharing of essential data between all relevant mobile applications, such as COVID KAYA, FASSTER, Stay.Safe.ph, and others.

National laboratory system

There are currently 40 laboratories certified to conduct COVID-19 testing by DOH using RT-PCR technology, with latest additions: Philippine Red Cross-Port Area in NCR, and Teresita Jalandoni Provincial Hospital Region in Silay City in Negros Occidental province in Region VI, as well as 12 laboratories using GeneXpert with latest addition: Mariano Marcos Memorial Hospital Batac, Ilocos Norte province in Region I. With now 3 molecular laboratories operating in NCR, the Philippine Red Cross (PRC) Helpline (1158) has seen a sharp increase in the number of calls up to 200 calls day, with most callers seeking guidance about their COVID 19 test results of COVID-19.

DOH with support from the private sector established the interim Laboratory Logistics Survey Tool to monitor the availability and consumption of supplies, and equipment across all laboratories.

WHO is supporting DOH and the Research Institute for Tropical Medicine (RITM) with ongoing assessments of an additional 136 public and private laboratories.

Infection prevention and control

According to DOH, there currently are 1,186 health care workers infected with COVID-19, out of which 83% have mild symptoms, 17% are asymptomatic, and less than 0.1% have severe symptoms. Out of the accumulative total of 2,675 confirmed cases among health care workers, 32 have died.

Through its online trainings UNICEF reached:

- 5,545 frontline workers on IPC for home and community settings <https://forms.gle/WAVzGvMFC4geofdU9>.
- 1,132 cleaning and sanitary personnel on IPC

MTaPS trained <https://bit.ly/2YBGijZ>:

- 5,427 health workers on IPC for hospitals
- 2,611 individuals on Health Care Waste Management
- 993 individuals on Supply Chain Management

UNICEF is making the IPC modules available for persons with disability, including the use of sign language.

PRC now has 3 operating molecular laboratories in Metro Manila, which tested 94,941 specimens since the start: approximately 26% of the national test output in the Philippines.

UNICEF delivered 150 cleaning and disinfection kits to 21 health facilities in Maguindanao and Lanao del Sur (BARM). Kits include a manual with general guidance and instructions

The WHO Western Pacific Regional Office (WPRO) is organising weekly IPC webinars every Wednesday in June. To register for WPRO IPC network & updates, click [here](#). Additional resources are available [here](#).

Case management and continuity of essential services

The 7th webinar in the series **Stop COVID Deaths: Clinical Management Updates** organised by the University of the Philippines, in partnership with the National Tele-health Centre and the Philippine Health Insurance Corporation, to be held on 5 June 2020, is dedicated to **Supportive Care for Mild Pneumonia in Community Isolation: the Quezon Institute Experience**. bit.ly/StopCOVIDDeathsWebinar7

UNICEF, PRC and the Department of Social Welfare and Development (DSWD) are continuing the webinar series for social workers and community service providers: four of the five modules have been completed, reaching 2,693 individuals with topics on MHPSS; 2,293 with GBV, 1,164 individuals with case management, and 1,772 individuals with Violence against Children (VAC) and Protection against Sexual Exploitation and Abuse (PSEA).

DOH issued the below administrative orders aimed at strengthening the implementation of Primary Health Care through enhanced coordination between DOH, DILG and other relevant government and non-government stakeholders, including the private sector.

1. **DOH Administrative Order 2020-0024 Primary Care Policy Framework and Sectoral Strategies 22 May 2020**, to strengthen coordination among different bureaus in DOH and relevant government agencies, in particular LGUs, but also private sector, in a collective effort to ensure efficient and quality primary care
2. **DOH Administrative Order 2020-0024 Guidelines on Identifying Geographically Isolated and Disadvantaged Areas (GIDA) and Strengthening their Health System 27 May 2020** aimed at guiding all stakeholders in improving access to quality health care through Province-wide and City-wide Health Systems and equitable and sustainable health financing in GIDAs
3. **DOH Administrative Order 2020-0021 Guidelines on Integration of the Local Health Systems into Province-wide and City-wide Health Systems 22 May 2020** aimed at providing the general procedures and mechanisms by which LGU, national government agencies, and stakeholders can integrate local health systems into Province-wide and City-wide Health Systems
4. **DOH Administrative Order 2020-0019 Guidelines on the Service Delivery Design of Health Care Provider Networks (HCPN) 14 May 2020** aimed at setting standards of HCPN and apex hospitals to ensure that the continuum of care is delivered through a people-centred and integrated health system
5. **DOH Administrative Order 2020-0018 Guidelines on Contracting Province-wide and City-wide Health Systems 14 May 2020** aimed at providing guidelines and mechanisms by which the DOH contracts Province-wide and City-wide Health Systems for the delivery of population-based health services.

COVID-19 Total Financial Assistance
As of 02 June 2020

129.3
Million USD

Please see for details of all items distributed so far by DOH: <https://bit.ly/DOHCommDistribution>.

As of 29 May, WHO received more than US\$ 667.8 million and an additional US\$ 225.9 million in pledges to its global appeal. This includes €114 million from the European Union to support 80 priority countries with weakened health care systems and capacity including the Philippines.

The French government through its Development Agency AFD donated €2 million to fight COVID-19 in Southeast Asia, including laboratory strengthening support for RITM.
