Lao PDR
In week 4 and 5 2019, a total of 260 dengue cases including 1 death were reported, bringing the cumulative number so far this year to 545 (Figure 3). Dengue activity shows a consistent trend for the past two weeks and is increased compared to same period in 2018.

Malaysia
During week 5, 2019, a total of 3,223 dengue cases including 6 deaths were reported which is a 3.1% increase compared to the previous week. The cumulative number of reported cases as of 2 February 2019 was 15,469 cases, an increased of 9,993 cases (182.5%) compared to the 5,476 cases reported in 2018 during the same period.
Philippines (no updated graph available)
A total of 739 dengue cases have been reported nationwide from 20 January to 26 January 2019 (Figure 5), bringing the cumulative number to 12,431 cases in 2019.

Singapore
In week 5, 2019, there were 183 dengue cases reported in Singapore, which is 40 cases fewer than in the previous week (Figure 6). The number of cases reported to date in 2019 is higher when compared to the same period in 2018 (48 cases).
**Viet Nam**

As of 20 January 2019, there have been a total of 15,540 cases of dengue with no deaths reported in Viet Nam. Compared to the same period in 2018 (4,752 cases including one death), the cumulative number of cases reported has increased 3.3 times.

During week 3, there were 4,845 cases reported from 45 out of 63 provinces without deaths.
