Ensuring every baby is free of HIV, hepatitis B and syphilis

Reproductive, Maternal, Newborn and Child Health Services

Triple Elimination through a coordinated approach

HIV
<2% mothers living with HIV pass infection onto baby

hepatitis B
≤ 0.1% hepatitis B infections among children

syphilis
<0.05% babies born with syphilis infection (congenital syphilis)

Every child should be given the best chance to start a healthy life, free of preventable communicable diseases.
