

RUBELLA

is a contagious disease that can lead to **miscarriage, premature delivery or birth defects**

Rubella **REMAINS A THREAT** in the Western Pacific Region

DID YOU KNOW...

9 out of 10 women infected with the rubella virus early in pregnancy will pass the virus to their babies.

Children born with **congenital rubella syndrome** may suffer from **hearing, eye and heart defects**.

Rubella vaccines are **safe** and **effective**. They undergo rigorous testing and have an excellent safety record over the past **40 years**.

Two doses of rubella vaccine provide nearly **100% protection** against rubella.

YOU CAN STOP RUBELLA

Protect yourself and many others by making sure you and your family are **fully vaccinated**
