Reference material concerning the guidelines for implementation of Article 14 of the Convention

(Demand reduction measures concerning tobacco dependence and cessation)

In accordance with decision FCTC/COP4(8), the Convention Secretariat makes available a database of information sources related to these guidelines, based on the information presented by the Parties through their implementation reports and other international sources, as appropriate.

This list recommends key resources which are global, periodically updated, easily accessible, and directly related to Article 14. From these sites Parties will be able to find resources or links to resources that will help them implement Article 14, including the experiences of other Parties, examples of national guidelines, information about monitoring and evaluation, and a direct link to the WHO FCTC itself.

Cochrane reviews on tobacco cessation

http://www.cochrane.org/reviews/en/topics/94_reviews.htm

Cochrane reviews are prepared by an international network of researchers to help healthcare providers, policy makers and patients make well-informed decisions about health care. The Cochrane Tobacco Addiction Group, based at Oxford University, reviews the evidence base for individual treatments, community level interventions and public policies that aid smoking cessation and prevent tobacco use initiation.

SRNT’s cessation/treatment website treatobacco.net

www.treatobacco.net

Treatobacco.net is a periodically updated, independent website which summarises the scientific evidence on tobacco dependence treatment and has a resource library which includes national treatment guidelines.
