We Deliver: Creating Shared Value
We Seek: Effective Engagement

Making Progress on the Public Health Agenda

Chavanne B. Hanson, MPH, RD, LD, Nutrition, Health and Wellness Lead, Public Affairs
Nestlé SA
Summary of our Commitments

**Nutrition**

- Build knowledge leadership in children’s nutrition
- Lead the industry in nutrition and health research through collaboration
- Provide nutritionally sound products designed for children
- Help reduce the risk of undernutrition through micronutrient fortification
- Reduce sodium (salt) in our products
- Reduce sugars in our products
- Reduce saturated fats and remove trans fats in our products
- Encourage consumption of whole grains and vegetables
- Deliver nutrition information and advice on all our labels
- Provide portion guidance for consumers
- Promote healthy diets and lifestyles, including physical activity
- Promote healthy hydration as part of a healthy lifestyle
- Provide education programmes for good nutrition and feeding practices
- Ensure responsible marketing communication to children
- Market breast-milk substitutes responsibly

**Rural development and responsible sourcing**

- Roll out the Rural Development Framework to understand the needs of farmers
- Implement responsible sourcing in our supply chain
- Roll out the Nestlé Cocoa Plan with cocoa farmers
- Roll out the Nescafé Plan with coffee farmers

**Water**

- Work to achieve water efficiency and sustainability across our operations
- Advocate for effective water policies and stewardship
- Treat the water we discharge effectively
- Engage with suppliers, especially those in agriculture
- Raise awareness on water conservation and improve access to water and sanitation across our value chain

**Environmental sustainability**

- Improve resource efficiency in our operations
- Improve the environmental performance of our packaging
- Assess and optimise the environmental impact of our products
- Provide climate change leadership
- Preserve natural capital, including forests
- Provide meaningful and accurate environmental information and dialogue

**Our people, human rights, and compliance**

- Assess and address human rights impacts in our operations and supply chain
- Eliminate child labour in key commodities
- Ensure that all employees and stakeholders can easily report possible compliance violations
- Work against corruption and bribery
- Ensure all Nestlé units have basic safety and health protection systems for all employees
- Enhance gender balance in our workforce
- Offer 20,000 job opportunities for young people below 30 years of age at Nestlé in Europe
- Provide CSV, nutrition (NQ) and environmental sustainability training for our employees
Transparency through Reporting: Indices and Accountability
Our Expectations from WHO and its Member States in Engaging for NCD Prevention and Control

• **Point of Departure:**
  Respect for WHO and its Member States as Directing and Coordinating Authority

• **Formal Participation in Consultations, Hearings and other relevant Meetings**
  • To identify problems and develop pragmatic solutions for nutrition-related issues, important for both the public and private sectors
  • To explain/share consumer insights and communication, product innovation, technical solutions, support food safety and security, supply chain expertise and business contributions

• **A Joint Work Plan & Follow up**
  • Develop meaningful plans and progress indicators
  • Formal follow up and not just ad hoc “informal dialogues”
  • Mutually agreed timeline/deliverables
  • No surprises approach

• **Transparency, Openness, Inclusiveness, Accountability and Mutual Respect**
Effective Engagement to address NCDs
Where we are now/We want to do more

290 partnerships with Ministries of Education, Health, Sport, NGOs, Universities, Nutrition Institutes to promote nutrition education and physical activity among school-age children

Fight against NCDs and Improved mother/child health through education and awareness

Offering children access to athletics in over 100 Territories often intersecting with Ministries of Health to support programs on the ground

Labeling education developed by the Australian state and territory Government in collaboration with industry, public health/consumer groups

Strong collaboration/technical knowledge sharing to establish sodium targets for LATAM

CEO level support on Obesity Roundtable/Shared Consumer Insights
Nestlé Progress on Public Health

- Increase access to Good Nutrition
- Offer healthier Choices and Reformulation
- Research Capacity can advance Collective Knowledge
- Consumer Understanding allows for Improved Behavior Adoption

…Multi-sector Engagement will allow us to do more
