Welcome to Parallel Session 10

Antimicrobial resistance - AMR
How can progress on SDGs 2, 3 and 12 be accelerated by strengthening good governance for health through action across government sectors
Our Goals

• Importance of using a multisectoral approach to combat AMR

• Health promotion principles are the basis for tackling AMR and achieving the 2030 development agenda
Our Objectives

• Share experience, lessons and good practice on multisectoral coordination and action

• Demonstrate how health promotion principles are key for positive change to address AMR

• Show that addressing AMR is instrumental for progress on SDG 2 (Zero Hunger), SDG 3 (Health and Wellbeing) and SDG 12 (Responsible Consumption and Production)
Our Objectives

Discuss how coordinated action across sectors, with a focus on SDG 17 (Partnerships), can be instituted to contain AMR and achieve SDG 2 (Zero Hunger) and SDG 6 (Clean water and sanitation), thus realizing co-benefits for health, agriculture and the environment.
