WHO CONSOLIDATED ARV GUIDELINES:
WHAT’S NEW IN 2014?
Updated guidance on the diagnosis, prevention and management of HIV and related co-infections

WHO will provide a preview of the new guidance on selected HIV-related co-morbidities and co-infections, including: management of skin and oral opportunistic infections, management of Cryptococcus, use of cotrimoxazole and PEP. These guidelines are planned for official release in September 2014. WHO, PEPFAR, CDC, USAID, GFATM, and ASLM will also launch a multi-partner technical document entitled “Technical and operational considerations for expansion of viral load testing”.

Bag lunch will be served.

SUNDAY, 20 JULY
