Dr. Annette Sohn is the Director of TREAT Asia and a Vice President of amfAR – The Foundation for AIDS Research. She is based in Bangkok, Thailand, where she oversees an HIV research program in collaboration with 60 adult and pediatric clinical sites in 13 countries across the region that are part of the US National Institutes of Health’s International Epidemiologic Databases to Evaluate AIDS (IeDEA) global cohort consortium. She is especially interested in pediatric and adolescent HIV treatment outcomes and drug resistance, and human papillomavirus. She trained in Pediatric Infectious Diseases at the University of California, San Francisco. She is a member of the WHO’s STAC HIV, the 2015 HIV guideline development groups (Core Group, Clinical Guidelines), and the task force on HIV and TB.
