What are the ten global measurements for HIV epidemic?

1. Number of people with HIV
2. Domestic funding
3. Coverage of prevention services
4. Number of diagnosed people
5. HIV care coverage
6. Treatment coverage
7. Treatment retention
8. Viral suppression
9. AIDS deaths
10. New infections

Strategic information collected on these indicators will show progress towards the 90-90-90 targets by UNAIDS:

- By 2020, 90% of all people living with HIV will have been diagnosed.
- By 2020, 90% of all people with diagnosed HIV infection will receive antiretroviral therapy.
- By 2020, 90% of all people on antiretroviral therapy will have viral suppression.
