PHARMACOVILANCE ACTIVITIES IN CÔTE D’IVOIRE

DELEGATION

Dr Yao (WHO-CI)

Dr N’Guessan-Irió (DPM)
PRESENTATION OF THE COUNTRY

- Côte d’Ivoire is a french speaking country in west Africa
- Area: 322,462 km²
- National level of HIV: 4.7% (higher in some areas)
- War in 2002
- PNPEC = program in charge of people living with HIV
- SCMS, PEPFAR, CARE, EGPAF, Clinton Foundation …(ARV products suppliers)
INTRODUCTION

- No National Centre of Pharmacovigilance
- Pharmacovigilance supported by DPM (Direction de la Pharmacie et du Médicament)
- Project of a Pharmacovigilance Centre creation
- Project of Pharmacovigilance of ARVs in PNPEC
CURRENT ACTIVITIES of DPM

- Reception of reports from AFSSAPS and Pharmaceutical Plants
- Diffusion of informations to health practitioners
- Information of the Ministry in charge of health for decisions
PROJECT FOR THE CENTRE

- Identification of products adverse reactions in hospitals, chemist’ shops, program of specific diseases (HIV, TB, leprosy…)
- Studies of the different reports at the National Centre
- Answers of the Centre to those who notify
- Collaboration with international systems (UPSALA, AFSSAPS…)
- Form a database for further needs
CONCLUSION

- At present no Pharmacovigilance specific for ARV medicines

- The present workshop will contribute to implement pharmacovigilance of ARV medicines in our country
