WHO ICTRP Web Service

Conditions of Use

The ICTRP Search Portal provides access to a central database containing the trial registration data sets provided by the registries of the ICTRP Registry Network. This data is publicly available and has been centralized by ICTRP and reformatted for the purposes of rendering it accessible through the ICTRP Search Portal.

The ICTRP Search Portal Web Service allows users to interrogate the ICTRP database of clinical trials in real time by using XML web services. In essence, this means that an agreed partner website can access, search and display results from the ICTRP database on their site without actually coming to the ICTRP Search Portal website.

All users of the ICTRP Web Service are required to comply with the conditions of use described in this document. Failure to comply with these conditions will result in withdrawal of the ability to use the web service.

Access and use of the ICTRP Web Service is conditional upon acceptance and compliance with the terms, conditions, notices and disclaimers contained in this document. The ICTRP may amend the Conditions of Use at any time by posting the amended Conditions of Use onto the ICTRP Website. You should visit the ICTRP Website periodically to review the Conditions of Use. If you violate any Conditions of Use your right to use and access the Web Service may be terminated.

General
It is not the intention of the ICTRP to provide specific medical advice. The ICTRP requires users of the ICTRP Web Service to in turn make it clear on their website that their users should consult with a qualified physician regarding personal health/illness-related questions.

Although the data providers to the ICTRP database meet certain criteria for quality control and content, the ICTRP cannot guarantee that information about clinical trials provided on and through the ICTRP database is complete, accurate, reliable or current. Records may contain inaccuracies or typographical errors.

All information on the ICTRP database is subject to modification on a regular basis without notice.

The ICTRP will make every reasonable effort to provide users of its web service with continuous access to the service. There will, however, be occasions when the service will be unavailable for use (including for maintenance).

The ICTRP has the right to change or discontinue any feature of the Web Service.

Your use of the ICTRP web service is at your own risk. The ICTRP will not be responsible in any manner for any claim, harm, loss or damage, whatsoever, arising from your use of the service. We will not be responsible for any detrimental reliance that you may place upon the web service or its contents.

Access to the ICTRP Web Service requires an electronic identification which consists of user name, password and potentially other security measures. You are responsible for the safekeeping of this access information. You may not sell, share or publish your access information.
You may not locally store any of the data accessed via the web service.

The user must not use the ICTRP Web Service in any manner or for any purpose which is unlawful or in any manner which violates any right of the ICTRP or which is prohibited by the Terms and Conditions

Records accessible in the ICTRP Website contain hyperlinks to internet websites operated by third parties. Such hyperlinks are not under the control of the ICTRP and the ICTRP is not responsible for the contents of any hyperlink or the site it links to. The inclusion of any hyperlink does not imply any endorsement of the Linked Site by the ICTRP.

The Terms and Conditions are effective until terminated by the ICTRP. Either party may terminate this arrangement by giving one month written notice to the other party. In the event of termination, you are no longer authorized to access the ICTRP Web Service. All restrictions imposed on you, disclaimers and limitations of liability set out in the Terms and Conditions will survive termination.

Who may use the web service
The ICTRP Web Service is available to the public for research purposes only. It is also intended for use by:

- Primary Registries in the WHO Registry Network
- Public agencies of WHO's Member States (government bodies)
- Internal WHO units, departments, regional offices, country offices, etc

A partner granted access to the web service shall not under any circumstances charge any fee to any third parties accessing the data contained in the ICTRP.

Copyright
The contents of the ICTRP database (and Search Portal) are protected by copyright. Users of the web service may not copy, reproduce, republish, frame, post, upload, distribute, transmit or modify in any way all or any part of the material accessed via this Web Service.

An acknowledgement of the ICTRP must be included on the web page of the Web Service User, and will include the current ICTRP banner. Use of the WHO emblem is not authorized in connection with any matter relating to this web service. If you wish to use the WHO emblem then you must first obtain written permission to do so from WHO.

What are the resource implications
This is an additional service provided by the ICTRP in response to requests from potential users. The ICTRP Secretariat needs to recoup the costs of conducting the work necessary to provide the service to potential users. The cost charged by ICTRP for accessing the ICTRP web service can be provided upon request.

Questions
If you have any questions about the ICTRP or these conditions of use please contact ictrpinfo@who.int.

Definitions
ICTRP Web Service: allows Web Service Users to interrogate the ICTRP database of clinical trials in real time by using XML web services.

ICTRP database: a central repository containing data provided to the ICTRP by its data providers (see http://www.who.int/ictrp/search/data_providers/en/index.html)
