SPECIFICATIONS
Capacity: 3 ml.
Graduations: Double Scale
Material of the syringe: Popypropylene
Needle: Stainless Steel 304
Prevented from re-use by:
After the injection, the user presses the plunger fully until reached the end of the barrel. This will activate the safety mechanism. Then draw back the plunger. The needle will enter the syringe and tilt to one side. Once the needle has been retracted into the syringe, snap the plunger along at the break point. The needle is now protected and the syringe cannot be re-used.
