HEALTH SYSTEM IN YEMEN

65% affected
Approximately 19.7 million people need health assistance in Yemen - an increase of 3.1 million people in the last year.

Devastation of the health care system

Out of approximately 5000 health facilities:
- 51% are fully functional
- 35% are partially functional
- 14% are non-functional

In 2013, 90% of Health Facilities were functional (Source: SARA).

NO doctors
In at least 17% of districts in Yemen
10 per 10,000
Number of health workers per population

WHO recommends a minimum of 22 health workers (medical doctor, nurse, midwife) per 10,000 population.

120 incidents recorded since 2015 as attacks on health care.

60,000 conflict-related injuries reported by health facilities since 2015.

Immunization coverage
20-30% drop
resulting in children being more vulnerable than ever to vaccine-preventable diseases.
