To: Johan Prévot
   Executive Director, IPOPI
   Prof. Stuart Tangye
   Chair, IUIS Expert Committee on Inborn Errors of Immunity

RE: Letter of support to IPOPI’s and IUIS’ application on in-vitro diagnostics for PIDs

Dear Mr. Prévot and Prof. Tangye,

This is to confirm the support of the European Federation of Immunological Societies (EFIS) for the joint appeal of the International Patient Organisation for Primary Immunodeficiencies (IPOPI) and the International Union of Immunological Societies (IUIS) to the World Health Organisation (WHO) to include essential diagnostic tests of primary immunodeficiencies in the soon-to-be-revised WHO Essential In Vitro Diagnostics List.

Please know that EFIS applauds and fully endorses this initiative.

Sincerely,

René van Lier
President, EFIS
