Call for Full-Time Medical Devices Expert Consultant to Support COVID-19 in Geneva, Switzerland for 3-6 months

Applications will only be considered if they comply with all the requirements below.

Required:
- Postgraduate university degree in Biomedical Engineering, Clinical Engineering, and/or related fields.
- At least 7 years of experience in clinical settings managing medical devices, including the selection, description, procurement, compliance to regulatory approvals, maintenance, training and safe use of medical equipment in health facilities.
- Knowledge of public procurement process.
- Experience reviewing technical specifications and standards.

Desirable:
- Relevant work experience in a Ministry of Health and/or Non-Governmental Organization (NGO) to support low and middle-income countries, UN agencies, or public hospitals.

Terms of reference:
- Compile and integrate the technical specifications for the medical devices used for COVID-19 for external consultation or review with experts.
- Analyze and integrate information from other UN agencies, Non-Governmental Organizations (NGOs), regulatory agencies and funding partners related to medical devices for COVID-19.
- Synthesize information on regulation, user training, maintenance, decommissioning, re-use, and local production of priority medical devices for COVID-19.
- Analyze and present information on technical specifications, assessments, reviews, analysis, to be discussed with Office of Supply and Logistics and other WHO departments.
- Compile evidence and collate reviews from external experts and integrate input on innovative technologies to support the clinical management of COVID

Consultants are not WHO staff. Please review the WHO Conditions of consultants and the Swiss government's tax and social regulations for non-staff members.
