I like to appreciate very well the current draft of WHO Global Action Plan on Physical Activity (GAPPA). It really holds critical important points especially the proposed actions. Besides, I feel the GAPPA looks like smart and better if we include the following comments.

- The background section needs more explanation about physical activity, exercises, physical inactivity and sedentary behavior to give clear understanding for all readers.
- Replace ‘General Structure of the action plan’ on page 4 with ‘Scope of Applications’ since the structure of GAPPA will be discussed in the second separate section.
- Replace the ‘OVERVIEW OF THE GLOBAL SITUATION’ on page 4 with ‘Global Burden of Physical Inactivity’ and re-order according to the new arrangement.
- The ‘Cross Cutting Guiding Principle’ on page 13 should moved into ‘Introduction’ sub-section.
- The objective of the GAPPA should be stated clearly under ‘Structure of the GAPPA’ sub-section.
- The SWOT (Strength, Weakness, Opportunities and Threat) analysis of the GAPPA should be included and stated clearly in line with the four strategic areas and 19 proposed actions in the third section.
- The 19 proposed actions are looks too long and unable to understand. It is better if we make it short, precise and clear without losing its originality.
- Monitoring and Evaluation, financing of the GAPPA should be included.
- Country level physical activity department under ministry of health and WHO regional based physical activity ambassadors should be established to fasten the implementation of GAPPA. This should be stated clearly under ‘Implementation of the GAPPA’ section.
- The specific time table should be stated clearly in the implementation of GAPPA in line with the 19 proposed actions.
- The content of the GAPPA should be re-ordered as follows:

1. **Introduction**
   1.1. Background
1.2. Global burden of physical inactivity
1.3. Mandate
1.4. Guiding Principles
1.5. Scope of application
