Integration in other Medical Specialities

Knowing and understanding what and where services can be offered in both speciality

Dual directional relationships

Benefits:
• Improvement in communication
• Seamless care for patients
• Rehab preparedness
• Closing the gap between specialities
Integration in other Medical Specialities - Hybrids

- Obs & Gynae + SCI Rehabilitation = Fertility clinics for SCI patients
- Neurological rehabilitation/ABI rehabilitation + Palliative Medicine = NeuroPalliative
- Neurological Rehab/ABI rehab + Ophthalmology = Neuro-Ophthal
- Neurosurgery + Rehab + Psychiatry = Neuropsychiatry
Reflection

- Buy in from other members of the rehab team
- Regular meetings and emphasis on goals and timeline
- Interaction with other specialties on a regular basis
- Rehab Cycle: Audiology service
- Prioritize services in major hospitals
- Focus and build a service one at a time
- Emphasis on in-patient rehabilitation programme
- Postings to other speciality during post grad training
Outcomes

Specialty

- Visibility Breeds Strengths
- Involvement in the extremes of continuum spectrum
- Diversified Rehab Role

Health outcomes

- Can be general but some are possibly unique to different subsets of disability group
