CHAIR: ADRIAN WALSH
CO-CHAIR: MARC SHOTTEN (BY PHONE)

Attended by: Peter Hertzell ISO
Pauline Morgan UK DfT
Caesar Gonzalez WBG
Maria Segui-Gonzalez FIA
Giulio Galante UNDSS

AGENDA ITEMS

1. **Welcome and introduction.**
   It was noted that many of the usual members were unable to attend as they were engaged on Ministerial Conference planning

2. **Approval of minutes** - Approved.

3. **Discussion items** – *restricted due to a late start and shortage of attendees.*

**Observatories.**

The value of observatories was emphasised. The work of the combined group including SSATP, IRTAD, FIA and WB in support and development of The African Observatory which was supported by The African Union was noted.
It was also noted that regional differences in management, funding and application were expected but the basic value was considered important as the Asian Observatory was being established – this was likely to include both India and China.

Although a common taxonomy was desirable, observatories should aim to build capacity but needed to be portals for examples of good practice, policy development and performance indicators.

Future observatories including E Europe were to be considered.

The WHO status report should be the basis for targeting. Private sector involvement was to be encouraged.

**Sweden 2020**

The Academic Expert Group (AEG) Report was welcomed and the importance of encouraging ministerial involvement in the meeting was emphasised.

The key would be to capture the imagination of ministers to deliver economic and social benefits ideally through public private partnership.
