Dr Fodé SIMAGA
Dr Dembélé Mathurin
Outline of the presentation

I. PAMAC in Burkina
II. Collaboration between NTP and PAMAC
III. Technical Assistance
IV. Next steps
What is the PAMAC?

- The PAMAC (Programme d’Appui au Monde Associatif et Communautaire / Support Programme for Associations and Community Based Organisations) is the national structure for technical support and funding of associations and community based organisations involved in TB (and HIV).
- Established in 2003 by UNDP and National AIDS Council.
- **Mission**: strengthen technical capacity and funding of associations and CBOs to become stakeholders offering quality services in complementary services.
PAMAC in Burkina

- Global Fund Round 4 includes funding for PAMAC in Burkina.
- Community involvement in TB control in Burkina started with GF R4 implementation 2005-2009 through the PAMAC.
Collaboration between NTP and PAMAC at each level of health services

- At health District level: collaboration framework between district health authorities and associations/CBOs
- At health Regional level: collaboration framework between regional health direction PAMAC pivotal structure at regional level
- At Central level: collaboration framework NTP/PAMAC
