Screen shots of the data entry interface for the WHO Registry for the Epidemiological Surveillance of Drug Safety in Pregnancy.
### Add / Edit CRF

**Family Data**

- **Local ID & Enrollment**
  - Baby's local ID
  - Mother's local ID

- **Timing of enrollment**
  - LMP: [ ]
  - LMP unknown: [ ]
  - Gestation at enrollment (weeks): [ ]
  - Gestation age at enrollment not applicable (enrollment after delivery):

**Pregnancy, Delivery & Baby Details**

- Date of pregnancy outcome delivery: [ ]
- Gestation at pregnancy outcome delivery: [ ]
- Gestation calculation: [ ]
- Other method:

- Did labor start spontaneously?: [ ]
- Type of delivery:
- Forceps presentation:
- Pregnancy outcome:
- Evaluation of pregnancy outcome:

**Material Details**

- Data of birth of mother's delivery:
- Maternal age at delivery:
- Maternal death in pregnancy / delivery:
- Date of maternal death:
- Cause of maternal death:

- Maternal height (cm):
- First maternal weight recorded in pregnancy (kg):
- Maternal weight unknown:
- Data of maternal weight:
- Race:
- Total number of previous pregnancies:
- Systolic blood pressure mmHg:
- Diastolic pressure mmHg:
- Hypertension:

- If yes, select when:
  - 1st Trimester:
  - 2nd Trimester:
  - 3rd Trimester:
  - Other:
- Hemoglobin level g/dl:

**Other Details**

- Number of babies delivered:
- Birth order:
- No. Malformed in multiple set:
- Sex of baby / fetus delivered:
- Birth height (cm):
- Birth weight (grams):
- Birth weight unknown, weight (grams) at first assessment:
- Data of first weight assessment after birth:
- Baby length at birth (cm):
- Baby head circumference (cm):
- Child HIV status:
- HIV status confirmation:
- Date of last follow up:
- Baby/child status at last follow up:
- Date of death:
- Baby/child age at death (days):
- Born post normal (a/c): [ ]
- Karyotype:
