Violence Info
A global knowledge platform for preventing violence

Violence Info is an online interactive collection of scientific information about the prevalence, consequences, risk factors and preventability of all forms of interpersonal violence. There are dedicated sections for homicide, child maltreatment, youth violence, intimate partner violence, elder abuse, and sexual violence. The Studies section allows these findings to be explored in more depth, and the Countries section reports on countries’ efforts to prevent violence.

The development of Violence Info is a collaborative undertaking between WHO, Liverpool John Moores University and Public Health Wales.

Look up the latest data and information on violence and its prevention in 197 countries and areas of the world: http://apps.who.int/violence-info/
